***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 4, 6-9, 12-13, 17-20 and 22-27, drawn to apparatus, classified in class 248, subclass 306.
- II. Claims 28,30-31, 33-35 and 37-38, drawn to method for removing rack, classified in class 29, subclass 717.
- III. Claim 39, drawn to method for removing shelf, classified in class 29, subclass 721.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as method and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the method as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different method. (MPEP § 806.05(e)). In this case the apparatus can be used as a hanger for suspending object off the floor.

Inventions III and I are related as method and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the method as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different method. (MPEP § 806.05(e)). In this case the apparatus can be used as a hanger for suspending object off the floor.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the

inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
